eVerge Group Receives Recognition for CRM Solution Tailored to Financial Institutions

Plano, Texas (October 22, 2009) – eVerge Group received “Honorable Mention – Industry Solution” recognition at this year’s Oracle Titan Award ceremony in San Francisco on October 11, 2009. The award is in recognition of eVerge Group’s CRM solution designed specifically for financial institutions.

eVerge Group’s CRM solution for financial institutions enables banks and credit unions to drastically improve their ability to understand their customers, coordinate selling and marketing activities, and understand the effectiveness of their efforts as well as the profitability of their customers. In addition to providing these capabilities for the entire financial institution, data from the core processing system is also embedded within the system, providing a consolidated desktop where a banker can see a complete view of the customer.

eVerge Group’s proven banking solution leverages a field-ready solution set, which significantly decreases implementation costs and accelerates time to market. Components of this solution set include over 130 predefined banking-specific data fields, banking-specific page layouts, embedded financial account analysis summaries, “out-of-the-box” business process automation and preconfigured reports specific to financial institutions.

The CRM solution for financial institutions is a product of eVerge Group’s CRM expertise and banking industry experience. According to David Wright, Industry Director with Oracle’s Financial Services IBU, “eVerge Group brings a legacy of banking, CRM and Siebel product knowledge and intellectual property to the table, with dedicated CRM resource teams that understand and focus *exclusively* on the banking industry and associated implementations.”

eVerge Group has implemented this CRM solution at a number of banking institutions across the U.S. and is currently evaluating the solution with additional institutions.

###
