

OBIEE 11g Readiness Assessment

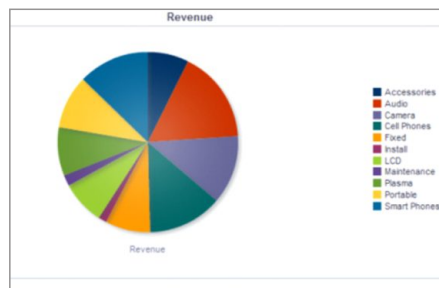

How can you leverage the revolutionary user interface in OBIEE 11g?

With over 100 successful implementations of OBIEE, eVerge Group has a unique understanding of the features and functionality that many organizations have been asking for in their Oracle Business Intelligence implementation:

- **Improved Hierarchy Support** – 11g now supports ragged, skip-level and value-based hierarchies.
- **Ragged Hierarchy Support** – 11g provides the ability to compare differing levels of the hierarchy.
- **Integrated BI Publisher Reporting** – 11g supports pixel-perfect reporting developed within the web client.
- **Improved Look and Feel** – 11g has new visualizations, dashboard controls and interactions.
- **Enhanced Search Capabilities** – improved search capabilities in 11G makes it easier to locate reports and dashboards.
- **Delivered Integration with Essbase** – 11g offers robust integration with cube technologies, allowing for dynamic drill-down to relational detail data.
- **Score Carding Capabilities** – The new add-on module for scorecards allows users to build strategy maps, plans and scorecards.
- **Geospatial Functionality** – 11g offers extensive geospatial integration to allow plotting problem areas, identifying regional penetration and drilling to detail-based map integration.
- **Action Links to Source Systems** – 11g offers a new action framework enabling direct access to source systems, linking to additional data, sending notifications and triggering workflows.

As a leading implementation partner of OBIEE and the analytical applications, eVerge Group is uniquely positioned to provide a benefit analysis, readiness assessment and hardware configuration review for customers seeking to move to OBIEE 11g. eVerge Group has multiple projects currently underway utilizing the OBIEE 11g technology.

eVerge Group's 11g assessment provides clients with:

- Repository conversion assessment
- UI functionality overview and client applicability
- Hardware readiness assessment
- 11g Demo – utilizing client data and dashboards
- Overview of the new scorecard application and cost/benefit analysis for your organization
