

Oracle Business Intelligence (OBI EE+)

eVerge Group has been a pioneer in deploying Oracle BI EE to large/mid-size corporations, enabling them to consolidate data from various sources and present it in a manner that is customizable to each user. This access to relevant data in a more useful format allows knowledge workers within their respective areas of expertise to make better and more timely business decisions.

eVerge Group has been working with Oracle BI EE since its inception in 2001. Recognizing very early on that this was an extremely powerful solution that added tremendous business value, we incorporated it into our strategic solution offerings.

eVerge Group is uniquely qualified to deliver Oracle BI initiatives by drawing on years of successful engagements utilizing the Oracle BI suite. The ability to connect to almost any data source and its unified business model enables our customers to leverage their current technology investments and achieve a lower TCO.

Why Choose eVerge Group for your BI Project?

It's no secret why eVerge Group has become a leader in the implementation of business intelligence applications. Our BI practice is built upon those attributes that clients value most:

- 1. Experience and Expertise** – We only hire experienced consultants. Our consulting staff averages 5 years of experience working with business intelligence applications. As an organization, eVerge Group has:
 - 10+ years of experience with the product suite
 - Over 100 successful OBI EE projects
 - Experience with the pre-built apps (Sales, Service, Marketing, FINs and Procurement)
 - Experience with large clients - large infrastructure/big data
 - Expertise in most verticals (Manu/CPG/Retail etc.)
 - Domain experience in School Districts
- 2. Proven Methodology** – Our PrecisionFit[®] Methodology is designed to maximize user involvement and input through a process of iterative prototyping.
 - Engage the client team early to ensure success
 - Multiple iterations in the development cycle ensures requirements are met accurately
 - Ability to quickly address project road blocks or changing business requirements
 - [Click here to learn more about our PrecisionFit[®] Methodology.](#)
- 3. Flexibility** – Our consultants have both the technical knowledge and functional background to help deliver a solution tailored to your specific needs.
- 4. Breadth of Knowledge** – Because eVerge Group also implements major ERP and CRM applications, we understand your supporting applications that are integral to a comprehensive business intelligence solution.
- 5. Value** – Smaller, more highly qualified consultant teams working more efficiently, combined with reasonable billing rates, help eVerge Group deliver world-class results in an economical manner.

"eVerge came in and really showed us that they understood the application. They didn't come in with a sales pitch; their consultants actually sat down and started to solve the problems we were having."

Patrick McCormick
Director of IT, Apollo Group

"eVerge Group showed us the viability of using OBI EE dashboards and then helped with the development, implementation, training and user acceptance."

Richard Arnstein, Manager
of Customer Systems,
American Heart Association

OBI EE+ Platform

The Oracle Business Intelligence Suite Enterprise Edition Plus is designed to meet the requirements for a new class of enterprise business intelligence solution. It is a comprehensive and integrated suite of Analytic Tools designed to bring greater business visibility and insight to the broadest audiences of users, allowing any user in an organization to have web-based, self-service access to up-to-the-moment, relevant, and actionable intelligence.

Oracle Business Intelligence Enterprise Edition Plus has the following components:

Oracle BI Server

Common enterprise business model and abstraction layer

Oracle BI Answers

Ad-hoc query and reporting

Oracle BI Interactive Dashboards

Highly interactive dashboards for accessing business intelligence and applications content

Oracle BI Delivers

Proactive business activity monitoring and alerting

Oracle BI Disconnected Analytics

Full analytical functionality for the mobile professionals

Oracle BI Publisher (formerly known as XML Publisher)

Enterprise reporting and distribution of "pixel-perfect" reports

Oracle BI Briefing Books

Snapshots of dashboard pages to view and share in offline mode

Hyperion Interactive Reporting

Intuitive and highly interactive ad-hoc reporting

Hyperion SQR Production Reporting

High volume, presentation-quality formatted report generation

BI Applications

Oracle Business Intelligence (BI) Applications are complete, pre-built BI solutions that deliver intuitive, role-based intelligence for everyone in an organization—from front-line employees to senior management—that enable better decisions, actions, and business processes.

Based on best practices, these solutions enable organizations to gain greater insight and value from a range of data sources and applications including Oracle E-Business Suite, PeopleSoft, Siebel, and third-party systems such as SAP.

Application:

Financial Analytics

Oracle Financial Analytics helps front-line managers improve financial performance with complete, up-to-the-minute information on their department's expenses and revenue contributions.

Human Resources Analytics

Oracle Human Resources Analytics helps organizations improve overall workforce performance and managerial effectiveness while reducing costs.

Sales Analytics

Improve forecast accuracy, pipeline visibility, sales effectiveness and overall sales results. Oracle Sales Analytics provides hundreds of key performance indicators and more than 130 reports in five customizable dashboards.

Service Analytics

Oracle Service Analytics provides a comprehensive customer service solution for your entire organization, with hundreds of key performance indicators and more than 102 reports delivered in eight interactive dashboards.

Marketing Analytics

Oracle Marketing Analytics allows your organization to obtain maximum results from your marketing investments by providing your entire marketing team with a complete, up-to-the-minute picture of customer preferences, buying behavior, and profitability.

Supply Chain and Order Management Analytics

Oracle Supply Chain and Order Management Analytics delivers deep customer insight into order and inventory data so you can make better decisions in each stage of the order lifecycle.
